

Humidity Meter with Alarm (Optional)

ERC-301AD

Calibration certificate available on request.

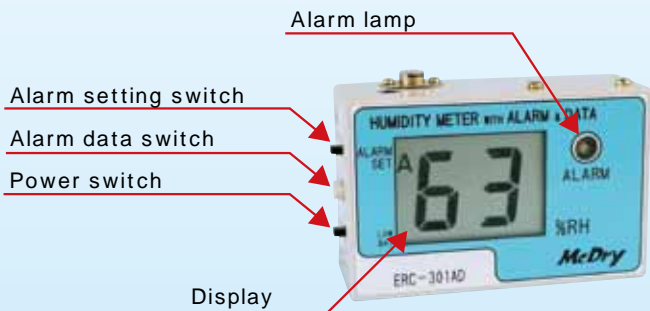

The ERC-301AD alarm-equipped humidity meter is fitted in place of the standard ERC-301B humidity meter.

The alarm lamp flashes if the humidity continuously exceeds the specified humidity value for a set time.

After the alarm lamp flashes, ten hourly humidity data values are stored. When the humidity continuously exceeds the specified humidity value for a set time, signal lights flash (optional) and a buzzer sounds.

E.g. : Humidity data after the alarm lamp flashes (hourly data)

Time (h)	Humidity (% RH)
0	30
1	30
2	30
3	40
4	40
5	40
6	40
7	40
8	40
9	40

Specifications

- Set humidity: 5%, 10% or 20% RH
- Set time: 60, 120 or 180 minutes
- At abnormal humidity: Alarm lamp flashes
- Humidity data after an alarm: 10 data values (1 per hour)
- Power supply: 4 AA alkaline batteries (approx. 1 year battery life)

McDry Optional Products

Catering to a wide-range of specifications

Alarm-equipped humidity meter	Reel rack	Stainless steel shelving	N ₂ socket
An alarm lamp flashes if the specified humidity is exceeded for a set time. 	Capable of holding different types of tape reel. 	Stainless steel shelves are also available. 	Allows the use of nitrogen gas also.
